

The RIA-Specific Cybersecurity Partner

Cybersecurity consulting and managed security services built exclusively for Registered Investment Advisers — aligned with Regulation S-P, NIST CSF 2.0, and the day-to-day realities of running an RIA.

WHO WE ARE

AdvisorDefense is the cybersecurity partner built around how RIAs actually operate, delivering rigorous, RIA-specific protection to firms of every size. We provide the tools, expertise, and strategies firms need to navigate a constantly evolving landscape of cyber risk and regulation. Through our affiliation with AdvisorAssist, a leading RIA compliance and risk management consulting firm, we deliver fully integrated compliance and cybersecurity solutions.

Built for RIAs

Purpose-built for the RIA channel, not a one-size-fits-all service provider.

Veteran-Led Expertise

Led by an industry veteran with decades of real-world CISO experience inside RIAs, asset managers, and broker-dealers.

Regulation S-P Ready

Services aligned to the SEC's Reg S-P amendments, NIST CSF 2.0, and NIST SP 800-30.

WHY IT MATTERS

SEC Regulation S-P Amendments — Compliance Now Required

The SEC's amended Regulation S-P requires RIAs to enhance how they safeguard client information. Larger RIAs ($\geq$ \$1.5B AUM) have been required to comply since December 3, 2025; smaller RIAs ($<$ \$1.5B AUM) have been required to comply since June 3, 2026. Firms must detect, respond to, and recover from unauthorized access to client data — with formal procedures for assessment, containment, and client notification within 30 days, plus oversight of service providers and breach notifications within 72 hours. AdvisorDefense helps you meet these mandates.

WHAT WE DELIVER

Cybersecurity Risk Assessments

Annual NIST CSF 2.0 / SP 800-30 assessments tailored to your environment, vendors, and dataflows.

Vendor Due Diligence Library

Curated repository of vendor findings reports for the FinTech, CRM, archiving, and PMS tools RIAs use.

Regulatory Exam Support

Hands-on help responding to SEC and state cybersecurity exam requests and information demands.

Policies & Incident Response Plans

Cybersecurity Policy and Incident Response Plans aligned to Reg S-P, with annual reviews and tabletop exercises.

Microsoft 365 & Google Workspace Reviews

Security inspection reports benchmarked against the Center for Internet Security (CIS) Foundations Benchmarks and CISA cloud security best practices.

Breach Response & Remediation

Embedded IR support — assessment, containment, evidence preservation, and 30-day notification analysis.
